Deliver Value Combining Technology with Art to Build Things That Matter

FRONT-END DEVELOPER | WEB DESIGNER | FRONT-END ENGINEER

A technically proficient and resourceful front end developer with progressive experience designing and developing the layout, visual design, and interactive elements of a website or application using languages such as HTML, CSS, and JavaScript. Leverage an unwavering commitment to quality and attention to detail to turn business requirements into creative and effective solution designs that optimize user experience. A talented producer and constant learner, who is invigorated by technical challenges that come with making intuitive web applications.

Problem Solver ... Creative ... Collaborative ... Effective Communicator

KEY QUALIFICATIONS

Languages: HTML, (S)CSS, JavaScript, NodeJS, SQL, Git

Frameworks/Libraries: jQuery, React, Bootstrap, handelbars.js, Express, Firebase, MySQL

Applications: VsCode, Figma, Photoshop, Illustrator, After Effects, Adobe Creative Suite, Jira

DIFFERENTIATING VALUE

- **Visual Communication:** Well versed in understanding how to balance elements, use color effectively, and create visually harmonious designs that greatly enhance the user experience of a website.
- **Creative Problem Solving:** Skilled at filling in the gaps for incomplete mock-ups and knowledgeable on modern technologies and modern design software creating visually appealing and well-structured web designs.
- **Keen Eye for Detail:** Adept at visual attention to details ensuring that website designs are translated into code supporting pixel-perfect implementation.

PROJECTS

Sleepy Gallows | GitHub |
Developer

Sleepy Gallows is an art and development portfolio using JAMStack.

<https://github.com/brittgalloway/SleepyGallows>

LiveApp | <https://sleepygallows.com>

- **Technologies:** Gatsby, Sass, Dato CMS

Animation | Sleepy Gallows | <https://sleepygallows.com/Animation/clientwork>

These animations were created from scratch for clients with TvPaint, and Adobe Creative Suite

Candy Fluffs | GitHub | <https://github.com/daleinen7/candyfluffs>

Lead UI Design and Code Maintenance

Candy Fluffs is an E-commerce store that sells art and comics primarily based on popular manga and anime. This website is created on a JAMstack with a small 3 person team.

LiveApp | <https://www.candyfluffs.com/>

- **Core Responsibilities:** Designer, Branding. Adding new features and fixing bugs
- **Technologies:** Gatsby, Sass, Dato CMS, SnipCart

HIGHLIGHTS OF EXPERIENCE

Cleverbridge ■ Chicago, IL ■ 2021 – Present

FRONT END DEVELOPER

Collaborate with client-facing staff to resolve client issues including day-to-day bug fixes. Contribute to full-stack design and develop features to meet customer requirements and business goals.

Selected Achievements:

- Improve online customer checkout experience by monitoring issues reported on carts using jQuery. Work with DOM and collaborate with client-facing staff to identify and implement timely solutions.
- Reduce failure and XSS vulnerabilities with major refactor of the base “Wait Don’t Leave” layer.
- Evaluate application errors and identify strategy to fix the issue and improve future maintainability by designing major updates on carts addressing client escalations.
- Update CSS to use modern techniques such as flexbox and grid allowing for future maintenance and scaling.
- Design and develop flexible layouts and interactive elements to accommodate multiple languages and varying word lengths optimizing user experience needs serving diverse customers.
- Support Marketing by building front-end applications with visually appealing designs aligned with organizational branding.

EDUCATION

Bootcamp Certificate January 2020 | Northwestern University | Evanston, IL

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Firebase, NodeJS, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

BFA in Animation May 2014 | California College of the Arts | Oakland, CA
